

Billet Mounting Brackets

Our patented quick-release billet mounting brackets are accepted by most race-sanctioning bodies and clubs. Flat surface mounts and dual clamp roll bar mounts combine with band clamps for 2.5 lb. fire extinguishers. Band clamps for 1.0 and 1.4 lb. fire extinguishers combine with flat surface mounts and single clamp roll bar mounts. Note: Clamps and mounts must be used together. First, choose the correct band clamp size, then choose a flat surface or a roll bar mount. One year limited warranty.

Extreme Duty Mounting Brackets

Speed is critical when deploying a fire extinguisher. Count on our patented Extreme Duty quick-release brackets to allow fast action while withstanding rigorous use. These NHRA accepted fiberglass-reinforced nylon brackets are designed to meet MIL-STD-810G and withstand inertia loads in excess of 27G. Made for extreme duty, they offer an exceptional mounting solution for off road and racing enthusiasts. One year limited warranty.

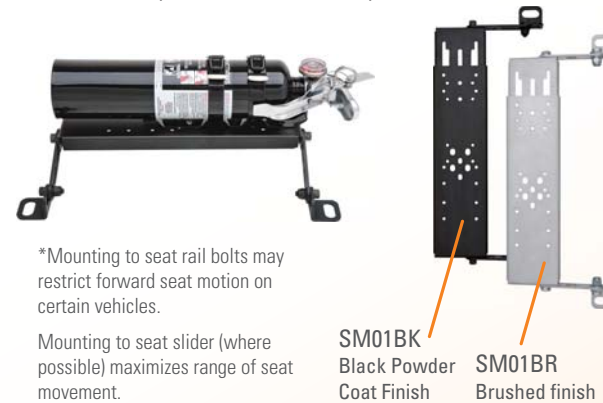

Description*	Part Number
Flat surface mount for 2.5 lb fire extinguishers	NB300
Flat surface mount for 5.0 lb fire extinguishers	NB425
1⅝ in. Roll bar mount for 2.5 lb fire extinguishers	NBR301
1⅝ in. Roll bar mount for 5.0 lb fire extinguishers	NBR401
1¾ in. Roll bar mount for 2.5 lb fire extinguishers	NBR302
1¾ in. Roll bar mount for 5.0 lb fire extinguishers	NBR402

*Designed for use with H3R Performance fire extinguishers.

Universal Fire Extinguisher Seat Mounts

Our fully adjustable NHRA accepted fire extinguisher seat mount installs easily in most vehicles, attaching to the seat rail bolts or above the slider of the driver or front passenger seats.* Not only does this put the extinguisher at your fingertips but it avoids the need to drill mounting holes into your vehicle. Available in black or brushed finishes, this patented mount accepts all H3R Performance fire extinguisher billet aluminum, Extreme Duty and standard brackets. Made in the U.S.A. One year limited warranty.

*Mounting to seat rail bolts may restrict forward seat motion on certain vehicles.

Mounting to seat slider (where possible) maximizes range of seat movement.

HalGuard™ rechargeable premium fire extinguishers contain a clean extinguishing agent that rapidly turns into a gas, and quickly attacks fires involving flammable liquids without leaving any residue to clean up, or any danger of electric shock. Often used in aircraft, HalGuard™ extinguishers are ideal protection for race cars, hot rods and high tech computer equipment. Available in a variety of sizes, ranging from 1.4 lb. to 15.5 lb. units. High quality steel cylinders and all metal valve construction. Six year limited warranty. UL listed and rated.

MaxOut™ rechargeable dry chemical fire extinguishers effectively smother flammable liquid fires without conducting electricity back to the operator – just the type of protection needed in an automotive environment (never use water on a flammable liquid or electrical fire). MaxOut™ extinguishers containing more than 1 lb. of agent are also rated for common combustibles like wood, paper, rubber, and some plastics. This added effectiveness makes them ideal for marine and home use as well. High quality steel cylinders and all-metal valve construction. Six year limited warranty. UL listed and rated.
